

# VEHICLE CONDITION GUIDELINES

During the term of the finance agreement, you are responsible for the day-to-day care and maintenance of the vehicle. To keep the vehicle in sound mechanical condition it must be serviced in accordance with the specifications and service intervals outlined in the vehicles service schedule. NFSNZ recommends servicing by an authorised Nissan dealer. It is important that you are familiar with these guidelines so you can determine if repairs will be required to the vehicle at the end of the finance contract. The Guaranteed Value for the vehicle has been set based on the vehicle being returned within the total kilometre limit, and in reasonable condition based on age and maximum kilometre limit.

In the event of an accident during your agreement you and your insurer are responsible for approving repair work to a standard that will meet the return conditions laid out below. In the event of a write-off you must settle your outstanding loan.

The table below provides an indication of the return standards expected. The list represents common items that are deemed outside normal wear and tear, however it is not a complete list. Your chosen Nissan Dealer will be able to explain their vehicle appraisal to you and what will need to be done, if anything, to bring your vehicle to the return standard.
